Community Care Workstream

Dr Vanessa Taylor Project Lead
John Humphreys Project Manager
Hester Benson Project Facilitator

Project Team & Partners

CLAHRC GM:

John Humphreys – Project Manager Catherine Perry – Research Associate Anne-Marie Sowerbutts – Research Associate Hester Benson – Facilitator Pete Mellor – Project Support Officer

University of Manchester:

Professor. Gunn Grande – University of Manchester School of Nursing, Midwifery & Social Work Dr. Vanessa Taylor – University of Manchester School of Nursing, Midwifery & Social Work

St Ann's Hospice:

Dr Dai Roberts – Head of Research

Funded by Macmillan Cancer Improvement Partnership

Collaboration for Leadership in Applied Health Research and Care (CLAHRC) Greater Manchester

Why has the project been established?

Part of the MCIP ambition is to ensure the best cancer care possible is provided by increasing the cancer-specific knowledge, skills and awareness of clinical and non-clinical staff working in primary, community and palliative care.

This will be achieved through identifying learning needs and implementing solutions to bridge the existing gaps as well as delivering new and enhanced learning and development opportunities

How will we do this?

- 1. Review of current evidence & national guidelines for training / development
 - 2. Mapping of current services against cancer pathway across Manchester
 - 3. Telephone-based interviews to scope size and structure of organisations
 - 4. Focus group with people affected by cancer (PABC)

A questionnaire which will:

Ascertain cancer-specific learning and development needs amongst workforce

Add depth to the organisational mapping of staff roles/numbers

MACMILLAN. NHS

From your perspective, what do you think are the positive experiences of interactions between health professionals and PABCs during the cancer journey?

What made them positive?
e.g. feeling confident that healthcare providers are skilled and knowledgeable

What could be improved?
